<sup>1</sup> Unless otherwise noted in the chart above, all plan deductibles and/or out-of-pocket maximums (OOPMs) are embedded.

### Aggregate vs. Embedded

**Aggregate (AGG):** In a family plan with an aggregate deductible, all individuals on the plan pay together toward one deductible amount, before the plan will make payments.

**Embedded:** In a family plan with an embedded deductible, each member pays their own, individual deductible. Once an individual has met their deductible, no further deductible is required of them for that plan year. Other family members continue to pay toward their individual deductibles until the family deductible is met. An embedded out-of-pocket maximum works the same way.

### Standard vs. Non-Standard

Standard plans are based on what the state dictates must be included in benefit details. Non-Standard plans contain unique features that enhance the value of the benchmark benefits.
